-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

- 6) ☐ Other: ____.

Claim Objections

1. The claims are objected to because the lines are crowded too closely together, making reading and entry of amendments difficult. Substitute claims with lines one and one-half or double spaced on good quality paper are required. See 37 CFR 1.52(b).
2. Claim 7 is objected to because of the following informalities: It is suggested that the term --as-- be inserted between the terms "formed" and "a" in line 4 of claim 7 for grammatical clarity. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 5-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Imao et al. Imao et al shows a spoke having a spoke body with a pair of coupling end portions (1 and 2) that are opposite to each other in the longitudinal direction and are adapted for connection to a wheel rim and hub. Each of the coupling end portions (1 and 2) is tubular.

One coupling end portion 2 is formed with an external screw thread 2a. As shown in Figure 5, one of the coupling end portions 5 may be formed with an internal screw thread. One coupling end portion 1 is formed with a bend and has a distal end formed

with a radial end flange. The spoke has an outer wall surface with a circular cross-section, as shown in Figure 4.

Allowable Subject Matter

5. Claims 2-4 and 9-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references are considered to show spokes having non-circular cross-sections. For example, Pearce et al shows a spoke of the type described above.
